

In the fall, the mushers are gathering supplies and freezing them. Sometimes a musher uses a band saw to cut up frozen salmon and moose meat into cubes for his or her dogs. If the cubes were 3 cubic inches each, how many cubes of frozen meat would fit in a school lunch box?

Cube

Jeff King has been training his sled dog team each day. The first day, they ran twenty miles. The second day was thirty-two miles. The third day, they ran forty-five miles, and then the fourth day, they completed a ten-mile run. For days five through eight, they repeated the same training schedule. What is the total number of miles they ran in eight days?

The Iditarod Air-Force is made up of volunteer pilots. Their job before the race is to fly in supplies to the checkpoints. If eight IAF pilots flew 11 flights, carrying 12 supply bags on each flight, how many supply bags were carried to checkpoints?
